8 Supplementary Fig S1. Viability of *C. albicans* during hyphal morphogenesis in
 9 presence of Msp1. Density of *C. albicans* (starting from 10⁶ cells/ml) after 3 hours and
 10 6 hours of hyphal induction during co-incubation with Msp1 from *L. rhamnosus* GG (10
 11 and 50 µg/mL). As a negative control, PBS was used.
